

Trapezoids

- Four sides.
- Exactly one pair of parallel sides.
- The median is parallel to the bases.
- The median has a length equal to the average of the bases.

isosceles trapezoid

- A trapezoid with congruent legs.
- Opposite \angle 's are supplementary.

Find the missing values.

2.

4.

6.

If $BG = 8$, then $CF = \underline{\hspace{2cm}}$ and $DE = \underline{\hspace{2cm}}$.

If $CF = 10$, then $BG = \underline{\hspace{2cm}}$ and $DE = \underline{\hspace{2cm}}$.

If $DE = 15$ and $BG = 7$, then $CF = \underline{\hspace{2cm}}$.

If $CF = 2x + 4$, $BG = 2x + 1$, and $DE = 3x + 2$, then $x = \underline{\hspace{2cm}}$.
